Staff is prepared to update the BOCC regarding the use of Open Space Properties for camping considering recent Board direction. Staff utilized material that was provided by a group of concerned citizens as well as the Colorado State Forest Service Colorado Wildfire Risk Viewer. The Viewer is designed to support community leaders by showing potential Burn probability, Fire Intensity and Risk to Assets for any specific location in Colorado.

Additionally, Staff prepared a list of potential stakeholders for the camping advisory board as requested by the BOCC.

Staff has combined the Viewer data with Open Space property boundaries to summarize wildfire risk to each location and is prepared to present the information at the Board's convenience.
