

Community Needs Assessment

Douglas County, Colorado

September 2020

1. Executive Summary

COVID 19 has caused a significant increase in the number of residents requesting assistance to meet their basic needs. Housing, utilities and food have been identified by low-income residents as the top three direct services needed to achieve self-sufficiency. The increased number of residents also requires a more robust system of collaboration between human service organizations to prevent duplication of service and improve access to care. Significant CARES Act funding has been made available, in the near-term, to assist local human service non-profit organizations and provide additional direct support to vulnerable residents. Due to the evolving nature of the COVID 19 pandemic, Douglas County is limiting the scope of the 2020 Community Needs Assessment to 1 year. This will allow local leadership the opportunity to consider the short-term needs faced residents and further evaluate the long-term impact of COVID in the coming year.

2. Evaluation of Past Performance and Environmental Scan

The 2017 Community Needs Assessment identified affordable housing, transportation, integrated care, wellbeing and childcare as the highest priority services needed by residents working to overcome the impact of poverty. The Community Action Plan identified Douglas County Cares, the Community of Care Network and the Community Data Project as the 2 programs which would support meeting these needs in 2018 – 2020. Since 2018 322 people from 104 households have been served through emergency assistance and long-term case management through Douglas County Cares, 74 agencies have participated in providing integrated care through the Community of Care Network and 19 agencies now participate in the Community Data Project.

Through DC Cares 64% of participants who have completed the program and obtained the outcome of achieving self-sufficiency in the past three years. This has been accomplished through case management, collaborative services and primarily, rent assistance and supportive housing. During the 2020 COVID 19 pandemic, additional resources have been made available to support emergency needs of customers. Through a partnership with a local human service non-profit 53 households have been provided with one-time rent assistance to ensure stable housing during the pandemic. Customer who received services in the last 3 years were provided an opportunity to complete an online survey. Although the response rate has been very low, a few comments from residents over the last three years include:

“I cannot thank you enough for helping me and my family during our time of need. Your generous assistance will allow me to avert eviction while searching for affordable housing option and maintaining my children’s academic location.”

“This Thanksgiving was just the kids and I but what made it all possible is the fact that we had furniture to eat it on. Thank you! All of the kids went around the table saying how thankful they are for you and for all that you’ve done for us and said thank you for bringing our family back together.”

Those that did respond to the survey who received long-term case management and support did indicate that they “felt better off as a result of the services, supported in reaching their goals and felt valued as an individual.” Respondent, who only received hotel vouchers and were still experiencing homelessness indicated that the assistance provided did not make them feel better off as a result of the services provided. This indicated the value of supported case management and the need to provide long-term solutions for those experiencing homelessness.

Since 2018 the Community Data project has increased from 5 initial partners to over 20 organizations that utilize the system to report and track services provided to vulnerable populations. The most significant outcome from this project was the utilization of data gathered over the last 3 years to track increased need during the COVID 19 pandemic. The data system was instrumental in capturing real time data from food banks across the county and comparing the volume of need to the previous year. These weekly reports resulted in additional assistance provided to foodbanks who had seen a quadrupling of their customer base during the height of the Stay at Home order.

Lastly, the strength of the Community of Care Network was critical to meeting the need of vulnerable residents during the pandemic. Within a couple weeks of onset, a workgroup focused on meeting the food, shelter and emergency needs of vulnerable residents was convened. The strength of the Network was apparent in the rapid response to the emerging needs of residents through cooperative sharing of resources and strategic planning to address emerging needs.

3. Geographic Area Covered by the Assessment

The assessment includes the county of Douglas, Colorado. This region is the southern-most county of the Denver metropolitan area. It is a mix of suburb and rural areas. Population centers include unincorporated Highlands Ranch, the city of Lone Tree and the towns of Castle Rock and Parker. Rural areas to the west and south include Roxborough, Franktown, Sedalia and Larkspur. As the southern-most region of the metro area, Douglas County serves as a bedroom community to Denver to the north and Colorado Springs to the south. Lack of transportation options between communities in Douglas County is the primary barrier faced. Castle Rock, the County seat and where the majority of human services are available, is not connected to the regional public transportation system.

4. Community Resources

Douglas County has a strong safety net system of care and regularly engages with multiple partners to serve low-income residents. This system of care is supported through the Community Data system, multiple collaborative program including the Community of Care Network, Douglas County Cares, Winter Weather Care, and recently the Human Needs Taskforce Food, Shelter and Emergency Assistance Workgroup. For a complete list of partners see Appendix A.

Recently, through local CARES Act funding, Douglas County has earmarked \$2.5 million to support non-profit organizations, including providing financial support to organizations who provide direct services to

low-income individuals. The goal of this program is to strengthen the organizations who provide direct service and ensure their long-term ability to serve our vulnerable residents.

Secondly, the County has authorized the use of CARES Act funds to provide \$1.5 million in general assistance to residents impacted by COVID. Through the Department of Human Services, these funds will assist residents earning under 80% of the Area Median Income in paying their bills. Both of these programs will operate as funding is available or until the end of 2020.

Local CARES Act CSBG funding has been earmarked by the Tripartite Board to assist with rent and hotel vouchers. These funds will be held until 2021 to supplement the need for assistance once local CARES Act funding is no longer available. For these reasons, the 2020 Community Needs Assessment is being limited to a 1 year scope. This will allow local leadership and the Tripartite Board to better understand the lasting impact of COVID, especially after the local and CSBG CARES Act funds have been expended.

5. Data Analysis

Due to the ongoing impact of COVID 19 in Douglas County and on vulnerable residents, Douglas County has chosen to modify its approach to completing the 2020 Community Needs Assessment. It is the intention of the County to utilize this process to provide an interim Need Assessment for 2021 and will collaborate with the Community Development Block Grant Consolidated Plan process in 2020 and 2021 to create a more comprehensive and integrated plan to assist low-income residents.

For 2020, Douglas County gathered demographic data from the U.S. Census Bureau through the Community Action Partnership, service data from the Community Data System, intake surveys from residents seeking services at a local human service non-profit, surveys from residents at a local service event and hosted a key-informant forum with partners online.

According to 2018 American Community Survey the population of Douglas County is estimated to be 328,614. Of those, 4.54%, or 14,862 live under 125% of the Federal Poverty Level (FPL). Due to the cost of housing in Douglas County, those who live below 200% FPL are considered vulnerable. There are 29,241 living under 200% FPL. Although those who are Hispanic make up just over 8% of the total population, they consist of over 13% of those that live under poverty. Female head of house families total 39% of those who live under poverty.

The high cost of housing and the lack of available, affordable housing stock contribute to the barriers faced by low-income residents. Vacancy rates in the second quarter of 2019 were 0.2% or 258 units of housing out of 143,308 address. These low rates have been consistent dating back to 2017. Due to the impact of the COVID 19 Stay at Home issued in March of 2020, unemployment in Douglas county went from a 3 year average of 3% or less to 8.7% in June of 2020. These factors play a significant role in creating the conditions low-income residents face in Douglas as they work to achieve self-sufficiency.

Beginning in February 2020 Douglas County partnered with Help & Hope Center to gather information from first time customers seeking services from their organization. Help & Hope provides an array of service to meet the needs of low-income people. Since February, over 300 surveys have been collected. Customers were asked to select the 3 services most likely to help them reach self-sufficiency. The top three answers were housing assistance, utility assistance and food assistance. When asked what barriers existed to receiving help the top answer was, "Did not know where to go to receive help." A large number

of “other” answers were submitted. “COVID” and the “shut down” that resulted from the pandemic, were including in the top responses. Of those that responded, 60% had not ever asked for assistance in the past. Almost 80% of responses indicated that they did not receive traditional services such as SNAP from the County.

Similarly, 90 households who attended a resource event in July were surveyed. The event drew families from across the county in need of back to school supplies. The survey asked attendees to identify what services would assist their family. Again, food assistance, housing and help paying bills were 3 of the top 4 responses, the other being educational supplies.

In August, Douglas County hosted the Community of Care Network meeting and invited attendees to participate in a key informant survey. Attendees includes staff and volunteers from human service organization across the county. These included those from the non-profit, faith-based, government and education sectors. A total of 29 people participated in the process. This group identified housing, transportation, mental health services and paying bills as the 3 most needed resources for low-income residents. When asked what conditions had the greatest impact on one’s ability to achieve self-sufficiency financial history, life skills and metal health were rated the highest. This is an indicator of the need to provide collaborative, case management services to low-income residents. When asked if they could do one thing to help people the most interesting answers included:

- “Education and access to resources that exist in the community BEFORE people are in crisis.”
- “Help more long term”
- “Give hope”
- “Help develop and support self-efficacy and self-advocacy”

6. Key findings on the Causes and Conditions of Poverty

Douglas County has a relatively low poverty rate with less than 10,000 of our 350,000 residents living below the federal poverty limit. However, when you consider that almost 10% of the population lives under 200% FPL the number of residents living on the edge of poverty is significant. The fact the low-income resident identified the need for assistance with housing, utilities and food suggest that even meting basic needs has become challenging for some, especially those who have lost income due to COVID. The tripling of unemployment due to COVID has placed additional pressure on the safety net system of care and caused a significant increase in the number of residents experiencing the conditions of poverty in Douglas County.

As a result, the need to continue to assist residents with their basic needs is critical at this time. This should include housing, utilities and food assistance at a minimum. For many, this may be the first time they are experiencing need and the knowledge barrier on where to turn to for help indicates the need to strengthen collaboration between agencies and build a more robust referral network. Finally, for many, the need for long-term support and case management is critical and programs that support the achievement of self-sufficiency will still be needed.

The top barrier indicated by residents that they did not know where to go to receive help demonstrates the high number of “new” users to the system of care. The need to strengthen communication and

collaboration with vulnerable residents and between agencies is necessary to ensure deduplication of services and reduce the number of residents who may fall through the safety net.

The following 3 needs should be considered in formulating plans to alleviate the current causes and conditions on poverty found in Douglas County.

1. Low income residents need assistance to meet their basic needs (including housing, utilities, and food).
2. Low income residents need collaborative services (including resource navigation and case management) to better access resources.
3. Agencies need collaborative tools to facilitate support of services to low-income residents

What best describes your organization?

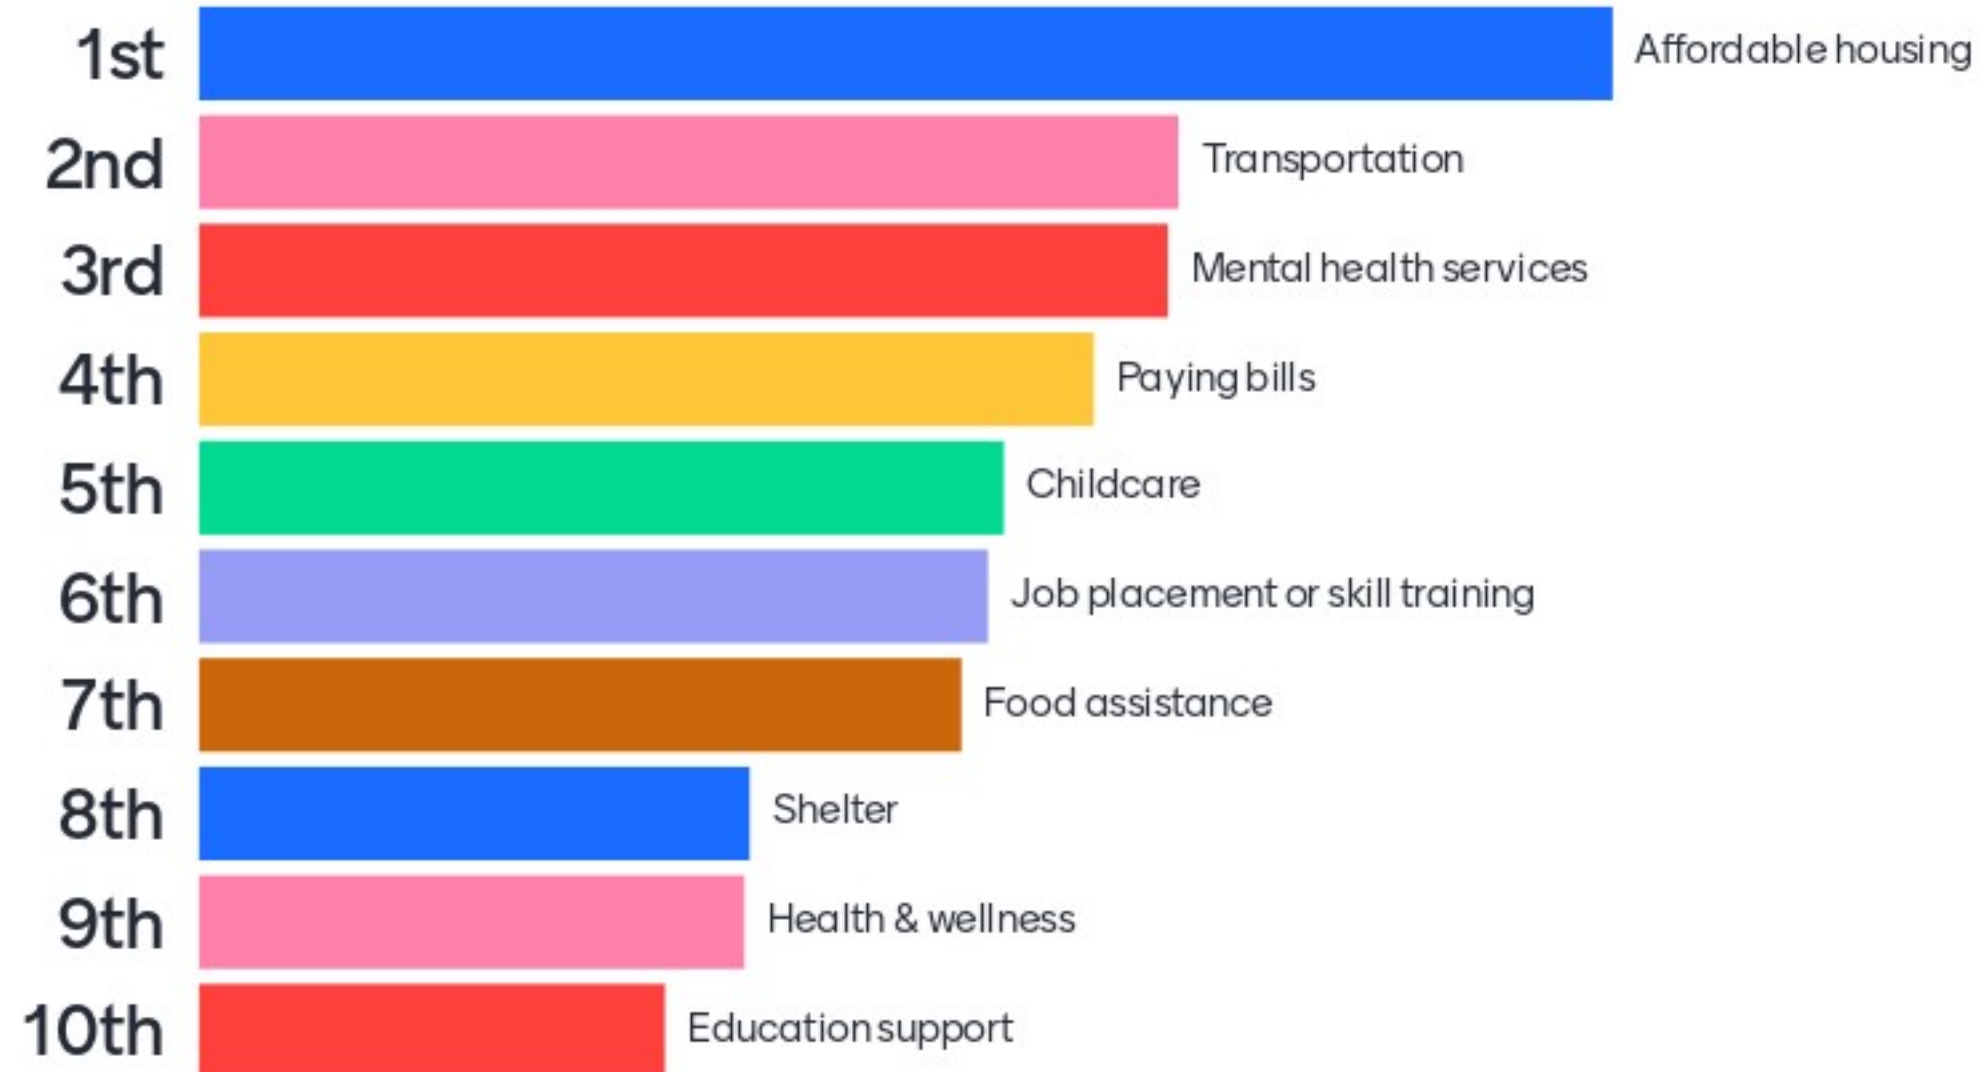

Please rate the impact the following conditions have on one's ability to achieve self-sufficiency.

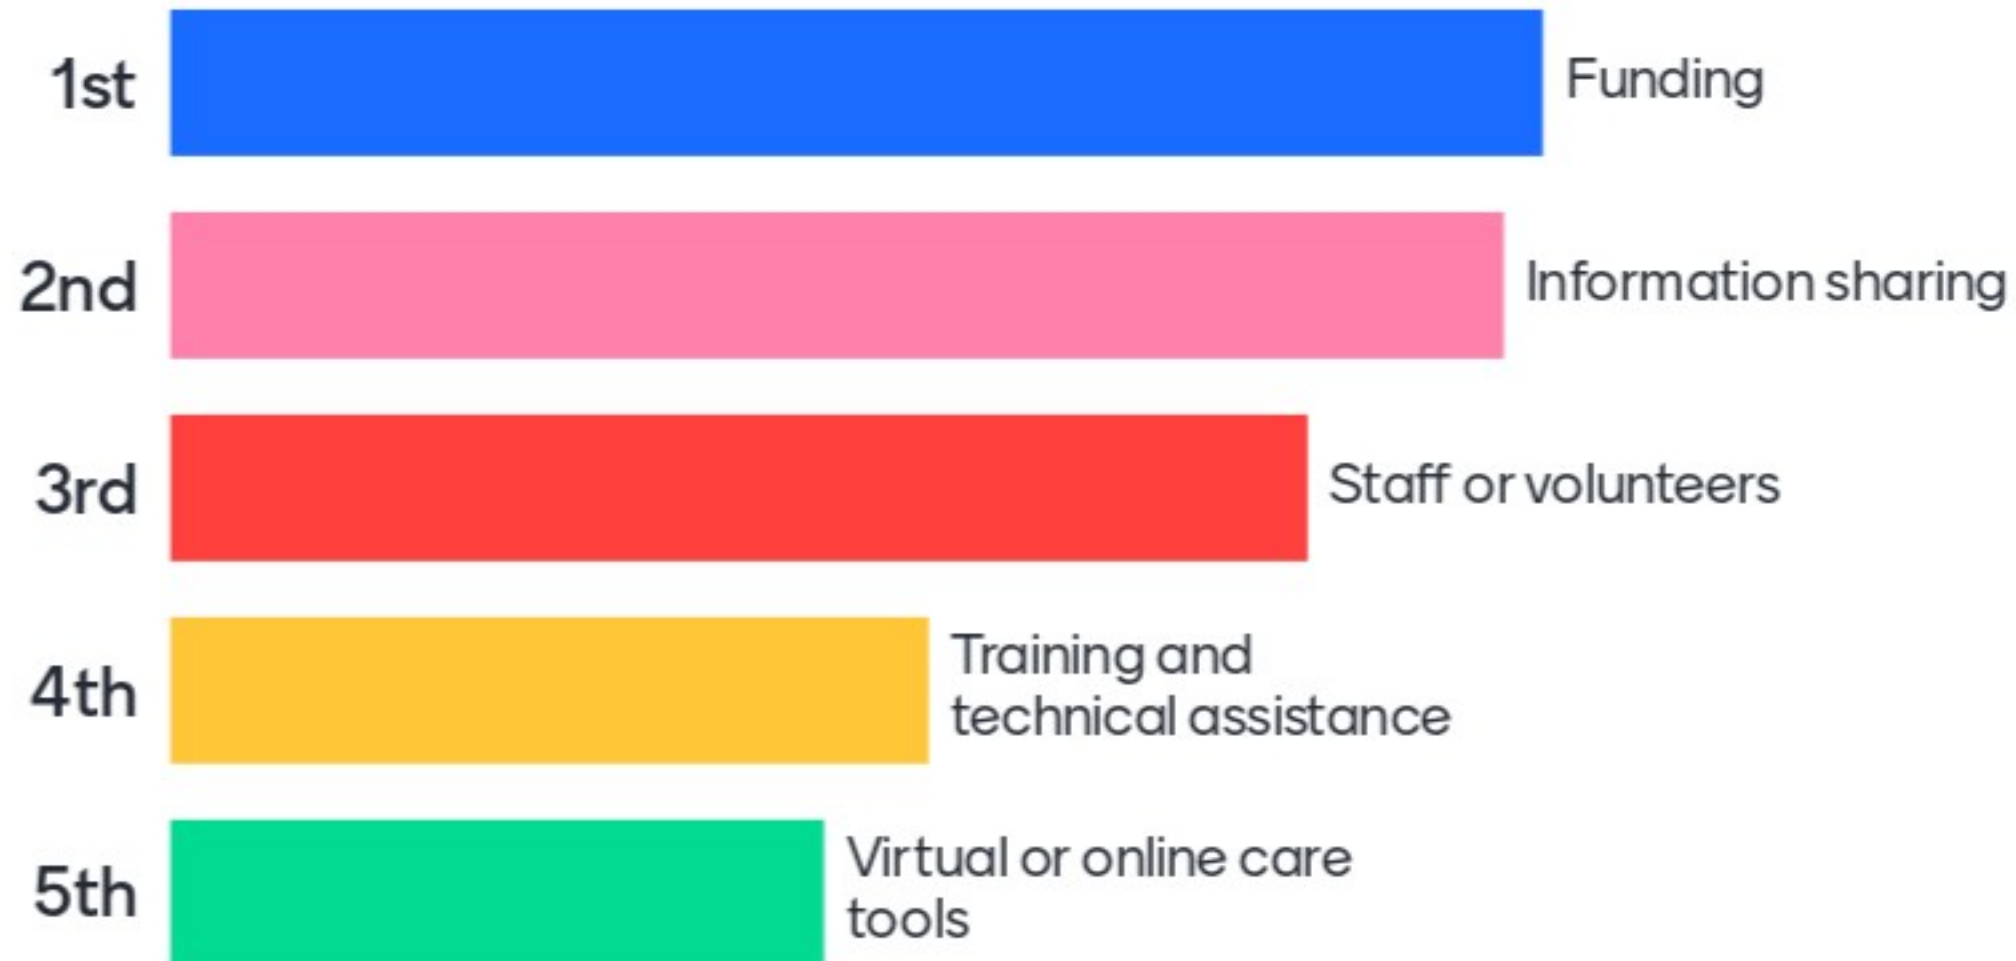

What resource is MOST needed to help Douglas County residents?

How often do you provide the following types of services for customers:

What would help your organization better serve residents?

If you could only do 1 thing to help people what would it be?

Buy them all a home

Prayer

Gain meaningful employment and confidence

Simply Listen...

Give hope

Provide (access to) healthy food

Motivational Interviewing

Give them a voice, a place where they can be seen and heard.

be present

If you could only do 1 thing to help people what would it be?

Coaching

Provide hope

Provide a good resource list for housing available.

Have access to affordable housing that we can reduce the stress for those facing eviction.

Purchase 100 acres of land to build tiny homes in order to house seniors

Make sure all their basic needs are covered

Education and access to resources that exist in the community BEFORE people are in crisis.

Worthwhile employment

Affordable daycare so people could work and begin getting out of poverty

If you could only do 1 thing to help people what would it be?

Provide everyone with enough food

Help develop and support self-efficacy and self-advocacy

Help more long term

Gain self sufficiency

Provide a clear path to self-sufficiency in cases of poverty or divorce which will lead to poverty.

Provide a better shelter solution for growing homeless population

Help connect them with mental health services.

Life Expectancy (2010-2015) - Geographic Disparity Report 1

The table and chart below display the minimum, maximum, median and interquartile ranges for census tract values of life expectancy within the report area.

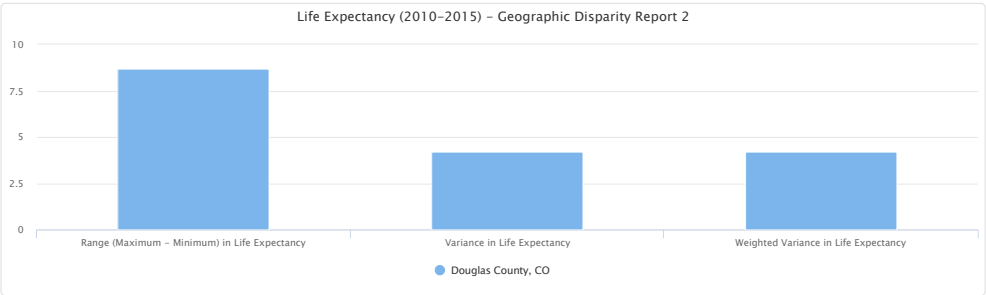

Report Area	Minimum	1st Quartile	Median	3rd Quartile	Maximum
Douglas County, CO	78.40	80.90	81.60	83.70	87.10

Life Expectancy (2010-2015) - Geographic Disparity Report 2

The table and chart below display summary measures describing the distribution of life expectancy values within the report area, including the range (maximum - minimum) and variance. Variance measures include the standard and weighted variance. Weighted variance takes into consideration the population of the neighborhoods/census tracts in determining the spread or values.

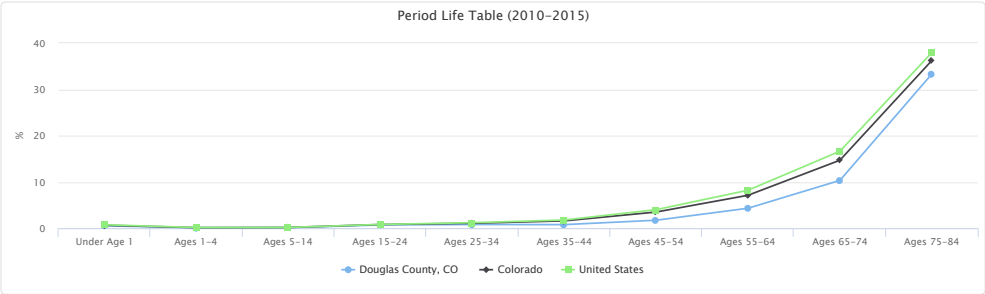

Report Area	Range (Maximum - Minimum) in Life Expectancy	Variance in Life Expectancy	Weighted Variance in Life Expectancy
Douglas County, CO	8.7	4.2	4.2

Period Life Table (2010-2015)

This table displays the probability of dying between the ages referenced in each category (among the population living to the first age in the reference category). For example, the data in column 0 expresses the probability of dying between one and four years of age. Data values are expressed as a percentage.

Report Area	Under Age 1	Ages 1-4	Ages 5-14	Ages 15-24	Ages 25-34	Ages 35-44	Ages 45-54	Ages 55-64	Ages 65-74	Ages 75-84

Education

Educational Attainment

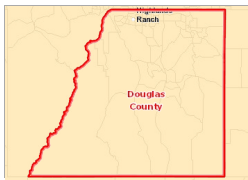

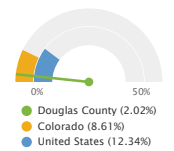

Educational Attainment shows the distribution of the highest level of education achieved in the report area, and helps schools and businesses to understand the needs of adults, whether it be workforce training or the ability to develop science, technology, engineering, and mathematics opportunities. Educational attainment is calculated for persons over 25, and is an estimated average for the period from 2014 to 2018.

For the selected area, 37.4% have at least a college bachelor's degree, while 12.2% stopped their formal educational attainment after high school.

Report Area	No High School Diploma	High School Only	Some College	Associates Degree	Bachelors Degree	Graduate or Professional Degree
Douglas County, CO	2.02%	12.2%	19.7%	8.1%	37.4%	20.5%

Head Start

Head Start is a program designed to help children from birth to age five who come from families at or below poverty level. The program's goal is to help children become ready for kindergarten while also providing the needed requirements to thrive, including health care and food support.

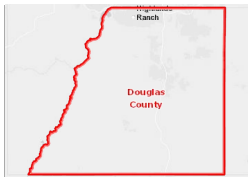

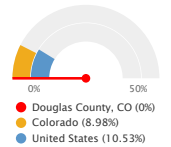

This indicator reports the number and rate of Head Start program facilities per 10,000 children under age 5. Head Start facility data is acquired from the US Department of Health and Human Services (HHS) 2018 Head Start locator. Population data is from the 2010 US Decennial Census. The report area has a total 0 Head Start programs with a rate of 0% per 10,000 children under 5 years old.

Report Area	Children Under Age 5	Total Head Start Programs	Head Start Programs, Rate (Per 10,000 Children)
Douglas County, CO	21,900	0	0%

Evictions

This indicator reports information about formal evictions based on court records from from 48 states and the District of Columbia, compiled by the Eviction Lab. The number evictions and eviction filings within the report area is shown in below. The “filing rate” is the ratio of the number of evictions filed in an area over the number of renter-occupied homes in that area. An “eviction rate” is the subset of those homes that received an eviction judgment in which renters were ordered to leave. For the year 2016, the Eviction Lab reports that, of 24,640 homes in the report area, there were 1,183 eviction filings, for an eviction filing rate of 4.8%. 521 of the eviction filings ended in an eviction, for an eviction rate of 2.11%.

Note: Indicator data do not include information about "informal evictions", or those that happen outside of the courtroom.

Jobs and Earnings by Sector

The number of jobs and total wage and salary earnings from employment in the report area are broken down by economic sector in the table below. These figures include both private and government employment. The sectors listed below represent private employment except for the last line which includes all the earnings from jobs with local, state and federal government. A negative number means that overall business in that sector lost money for the year in the report area.

Notes:
(D) - Not shown to avoid disclosure of confidential information, but the estimates for this item are included in the totals
(L) - Less than \$50,000, but the estimates for this item are included in the totals
(no data) - Data not available for this year.

Food Insecure Population, Percent by County, Feeding America 2017

Food Insecurity - Food Insecure Children

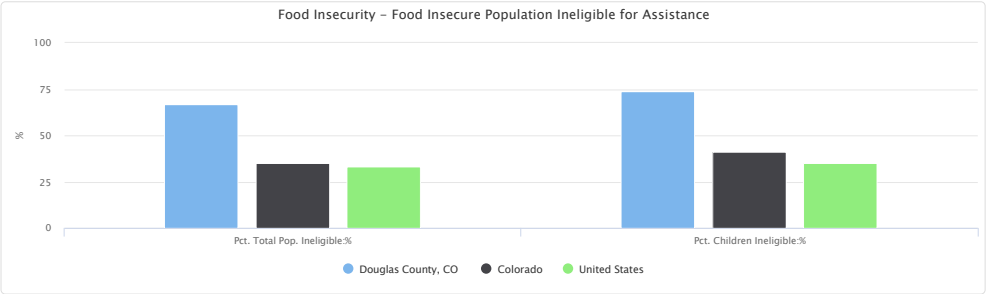

This indicator reports the estimated percentage of the population under age 18 that experienced food insecurity at some point during the report year. Food insecurity is the household-level economic and social condition of limited or uncertain access to adequate food.

Report Area	Population Under Age 18	Food Insecure Children, Total	Child Food Insecurity Rate
Douglas County, CO	89,346	9,560.00	10.70%
Colorado	1,266,857	177,360.00	14.00%
United States	73,641,039	13,411,620.00	18.21%

Food Insecurity - Food Insecure Population Ineligible for Assistance

This indicator reports the estimated percentage of the total population and the population under age 18 that experienced food insecurity at some point during the report year, but are ineligible for State or Federal nutrition assistance. Food insecurity is the household-level economic and social condition of limited or uncertain access to adequate food. Assistance eligibility is determined based on household income of the food insecure households relative to the maximum income-to-poverty ratio for assistance programs (SNAP, WIC, school meals, CSFP and TEFAP).

Report Area	Food Insecure Population	Food Insecure Population Ineligible for Assistance, Percent	Food Insecure Children	Food Insecure Children Ineligible for Assistance, Percent
Douglas County, CO	23,500.00	67.00%	9,560.00	74.00%
Colorado	596,150.00	35.00%	177,360.00	41.00%
United States	41,133,950.00	33.00%	13,411,620.00	35.00%

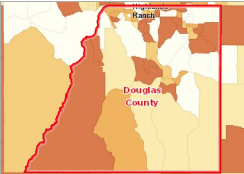

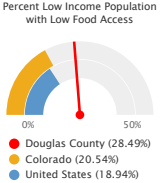

Low Income and Low Food Access

This indicator reports the percentage of the low income population with low food access. Low food access is defined as living more than ½ mile from the nearest supermarket, supercenter, or large grocery store. Data are from the 2017 report, [Low-Income and Low-Supermarket-Access Census Tracts, 2010-2015](#). This indicator is relevant because it highlights populations and geographies facing food insecurity.

Report Area	Total Population	Low Income Population	Low Income Population with Low Food Access	Percent Low Income Population with Low Food Access
Douglas County, CO	285,465	27,779	7,914	28.49%
Colorado	5,029,196	1,482,296	304,484	20.54%
United States	308,745,538	106,758,543	20,221,368	18.94%

SNAP Authorized Food Stores

This indicator reports the number of SNAP-authorized food stores as a rate per 10,000 population. SNAP-authorized stores include grocery stores as well as supercenters, specialty food stores, and convenience stores that are authorized to accept SNAP (Supplemental Nutrition Assistance Program) benefits. The report area contains 99 total SNAP-Authorized Retailers with a rate of 3.47.

Report Area	Total Population (2010)	Total SNAP-Authorized Retailers	SNAP-Authorized Retailers, Rate per 10,000 Population

Persons Receiving Medicare

The total number of persons receiving Medicare is shown, broken down by number over 65 and number of disabled persons receiving Medicare for the report area. The U.S. Department of Health and Human Services reported that a total of 46,166 persons were receiving Medicare benefits in the report area in 2019. A large number of individuals in our society are aware that persons over 65 years of age receive Medicare; however, many of them are unaware that disabled persons also receive Medicare benefits. A total of 2,670 disabled persons in the report area received Medicare benefits in 2019.

Report Area	Persons Over 65 Receiving Medicare	Disabled Persons Receiving Medicare	Total Persons Receiving Medicare
Douglas County, CO	43,495	2,670	46,166
Colorado	1,627,448	195,287	1,822,904

Asthma Prevalence

This indicator reports the percentage of adults aged 18 and older who self-report that they have ever been told by a doctor, nurse, or other health professional that they had asthma. This indicator is relevant because asthma is a prevalent problem in the U.S. that is often exacerbated by poor environmental conditions.

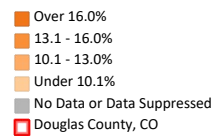

Report Area	Survey Population (Adults Age 18+)	Total Adults with Asthma	Percent Adults with Asthma
Douglas County, CO	193,467	22,871	11.80%
Colorado	3,831,497	493,570	12.90%

Deaths of Despair I

This indicator reports the rate of death due to intentional self-harm (suicide), alcohol-related disease, and drug overdoses per 100,000 population. Figures are reported as rates age-adjusted to year 2000 standard. Rates are resummarized for report areas from county level data, only where data is available. This indicator is relevant because suicide is an indicator of poor mental health.
