

# Cone Zone Report: Broadway/Plaza Intersection

Is your business near S. Broadway and Plaza Drive? We want you to know construction starts May 16.

## Here's what you need to know about upcoming construction May – September

The traffic signal and concrete pavement will be replaced at the intersection of Broadway and Plaza Drive. This is one of the County's oldest traffic signals. The intersection serves more than 40,000 cars per day.

### Traffic Details:

- Two through lanes will be open on northbound and southbound Broadway
- Eastbound and westbound traffic on Plaza Drive will experience various detours
- At times, turn lanes from Broadway to Plaza will be closed as crews work in the intersection
- Intermittent intersection closures for up to 15 minutes

### Stakeholders Can Expect:

- Business access to remain open
- Shifting traffic lanes and detours
- Tighter driving space
- Noise, concrete and dust
- Workers to be present from 7 a.m. to 7 p.m.
- Lane closures and detours may be in place outside of working hours as concrete sets

*Most road infrastructure is expected to last about 40 years. Highlands Ranch was founded in 1981, which means the original infrastructure is nearing the end of its expected life. In fact, this signal is one of the oldest in Douglas County. That's why Douglas County is being proactive and planning maintenance projects, like this one.*
