RE: Letter of Interest, American Rescue Plan Act – Cherry Creek Project Water Authority – Walker Reservoir

Dear Ms. Pulver,

The Cherry Creek Project Water Authority is pleased to present our project for consideration of funding of the American Rescue Plan Act (ARPA). This project serves residents of Douglas County and would be eligible to receive financial assistance through the Environmental Protection Agency's CWSRF or DWSRF programs.

The Cherry Creek Project Water Authority (CCPWA) was created in 2005 so local water providers could partner for water supply opportunities. The newest project is the construction of Walker Reservoir, a 650-acre-foot (AF) water storage facility. The partners, the Pinery Water and Sanitation District, Cottonwood Water and Sanitation District, Inverness Water and Sanitation District, and the newest member, Castle Rock Water will share in ownership and cost of the \$12 million reservoir, located near Franktown. This project will serve approximately 109,750 residents and is scheduled for completion in 2023.

Thank you for the opportunity and for your consideration of our project for potential funding from the American Rescue Plan Act. If you have additional questions or concerns, please feel free to call.

Sincerely,

Richard Krulish,
Executive Director, Cherry Creek Project Water Authority
