

Paperless Building Inspection Reports

June 7, 2021 - The Building Division has implemented a mobile solution for County Building Inspectors to perform inspections using iPads in the field, thus eliminating the need to leave a “pink copy” paper inspection form at the job site.

Permit and Inspection information is available 24/7, including *real-time inspection results* on our website at <https://apps.douglas.co.us/building/services>

- Select “Search Permits” (sign in is not required)
- Enter the Permit number or address
- Select the Permit to view
- In the Inspections History click “Print Report”

Another new feature - emails are now being provided with the Inspection Reports, to all permit holders and owners and will be sent automatically at the completion of the inspection, real-time to the email address listed in the contractor registration file.

Please note: There is no change to our text messaging option or to the to the Inspection Card on the job site.

We welcome your feedback at dcbuilding@douglas.co.us
