January 26, 2021

To whom it may concern,

I would like to express my appreciation for the Covid Best Practices Business Program. We were contacted as soon as the requirements were made available and again when the State approved the program for our county. The requirements were straight forward and Tobi Basile with the city was ready to do our inspection as soon as we were ready. The speed of implementation and organization was impressive. We continue to receive regular information and updates to the program which are very helpful.

The program has been critical in saving this business and the jobs it provides. The ability to provide limited indoor dining has done wonders for the morale of employees and customers and given this business a way to survive. It has allowed us to keep our employees and provide service to this community safely. Thank you to everyone involved making this program successful.
