

Dear Child Care Facility Designer/Engineer/Builder:

New or remodeled childcare facilities or early childhood education programs must submit plans to Douglas County Health Department (DCHD) for review and approval **prior** to construction or opening.

The plan review process is designed to occur prior to building or remodeling. This will prevent the need for costly and time-consuming modifications or additions after the facility is built. Failure to submit a plan review may result in DCHD reserving our approval to open the facility until requirements are met. DCHD's approval is required for the facility to be licensed by the Colorado Department of Human Services.

DCHD is respectful of the time and expense involved in building and remodeling a childcare facility. To make the process as efficient as possible, please follow these procedures:

- 1. Read and fill out the enclosed form completely. Your plans will not be reviewed until the procedures listed here are all met.
- 2. Plans must be submitted electronically to: eh@douglas.co.us or online at https://myhealthdepartment.com/DCHD
- 3. A plan review application fee of **\$120.00** will be invoiced once plans are received by DCHD. The application fee must be paid in full by the due date otherwise the approval of the plans may be delayed.
- 4. Invoices will be sent via email to your preferred email and instructions on how to pay the invoice will be provided with the emailed invoice. Invoices must be paid before the plan review will be conducted.
- 5. You will be notified within 14-30 business days after your plans are reviewed and approved or if more information is needed.

Additionally, if the facility will also have newly constructed or remodeled retail food service establishments (restaurants, grocery) and/or public or semi-public swimming pools, spas, and spray pads, then separate plan reviews for those areas are also required by DCHD. If the building department knows of any of the above facilities that will be opening or is being remodeled, it is recommended and requested that the certificate of occupancy not be issued until DCHD approves the facility.

If you have any questions regarding your plan submittal or want to make any changes/modifications after your submittal, please contact eh@douglas.co.us.

Thank you for your cooperation.	
Sincerely,	DCHD Use Only:

A. Radon Testing*						
Has the facility been tested for radon? OYes No						
*All facilities are required to test for radon. New facilities are required to test for radon within 6 months of occupancy. Effective July 1, 2022, radon measurement or mitigation in Colorado is required to be completed by a <u>licensed radon professional</u> . After remodeling, radon tests may need to be conducted again. It is recommended that facilities test for radon every 5 years .						
If yes, provide the testing results and list the d	late ar	nd the I	highest l	evel (pCi/L):

D. Plan submission						
For each question, indicate yes or no, and incl	lude th	ne date	submitt	ed, if applicable.		
Question Yes No Date Submitted						
Have plans been submitted to the local building department?						
Have plans for this facility been submitted to the Colorado Department of Human Services?						
Do you have similar facilities in other counties in Colorado? Yes No If yes, list other counties:						
*What plumbing code will be utilized to construct the facility?						

<u>E.</u> <u>Facility Site Plan</u> – Submit a site plan that includes the location of all outdoor areas that apply. <u>Check all of the following that apply:</u>

	Animal Enclosures*	Outdoor refrigerators or freezers	Swimming pools
•	Gardens	Outdoor storage areas	Trash/recycling/compost storage
	Grease Interceptor	Play areas	Well or spring
	Hot Tubs	Septic tank and leach field	Wading pools

^{*} Include the types of animals.

F. General facility floor plan/layout -

- 1. Submit floor plan drawn to scale that include all areas of the building.
 - a. For classrooms, include the number of children anticipated and their ages.
- 2. Include the location of all areas listed below that apply to the facility.
- 3. Please note, a separate drawing will be requested for kitchens.
- 4. Check all of the following that apply:

Plumbing and other fixtures	Designated areas
Bottle preparation sinks	Car seat storage
Chemical dispensing units	Chemical storage areas
Drinking fountains ³	Children's personal belonging storage
Garbage disposals	Diaper changing areas ¹
Hand washing sinks – label child and adult	Employee personal belonging storage
Laundry facilities	First aid supply storage
Showers/bathtubs	Meals/snacks/bottle preparation areas
Toilet facilities	III/injured child areas
Utility/mop sinks	Mat/cot storage ²
Ventilation fans	Medication storage
Water heater locations	Staff break areas
Art/Science Sink (for washing paints	Lactation room/prioritized or
brushes, cleaning science materials)	designated ⁴

¹ Diaper changing areas must be immediately adjacent to a hand sink and have adequate storage area for children's diapers, other supplies, and disinfecting solutions.

- 1) Provide reasonable unpaid break time, or allow an employee to use paid break and/or meal time, to express breast milk for her nursing child for up to 2 years after the child's birth;
- 2) Make reasonable efforts to provide a nursing mother with a private location in close proximity to her work area (other than a toilet stall) in which to express milk; and
- 3) Not discriminate against women for expressing milk in the workplace.

² Mats, cots, clean linens, clothing and toys may <u>not</u> be stored in bathrooms.

³ Drinking fountains are <u>prohibited</u> on designated restroom hand sinks, art, and science sinks

⁴ The Colorado Workplace Accommodations for Nursing Mothers Act establishes a recommended standard for an employer to:

G. Finishes

- Carpet may <u>not</u> be installed in the following areas:
 - o Kitchens
 - Restrooms
 - Under or around sinks
 - o Under or around diapering areas

- Laundry rooms
- Utility rooms
- Mechanical rooms
- 2. Non-carpeted areas must be tightly coved with approved concave coving at the floor to wall junctures.
- 3. Hand contact and splash areas of doors, walls, cabinets and shelves must be smooth, non-absorbent and easily cleanable.

Initial	Statement
	I confirm that the finishes in the proposed facility meet all requirements listed above.

H. Facility Operation Procedures

- 1. Drinking water must be accessible to children at all times.
 - If drinking fountains are not available, how will drinking water be provided to children during hours of operation?

2. Will linens be washed at the facility? Yes No
If no, describe where and how they will be washed:
3. Where/how will toys be washed, rinsed, and sanitized?
4. Separate identified storage areas shall be provided for each child's personal effects, clothing, and

- 4. Separate identified storage areas shall be provided for each child's personal effects, clothing, and bed linens. How will this be provided?
 - Examples: individual cubicles, lockers, coat hooks, drawers, or closet space
- 5. Lighting requirements must be as follows:
 - 30-foot candles upon play surfaces
 - 20-foot candles provided in restrooms
 - 10-foot candles provided in hallways and stairways

Initial	Statement
	I confirm that the light fixtures in the proposed facility meet all requirements listed above.

I. Kitchen and Food Handling Procedures

1. Submit a **separate** drawing for the kitchen/food handling areas.

2. Check all that apply:

Cooking equipment*	Food preparation sinks	Lighting
Dishwasher*	Grease	Recycle/damaged/returned
	interceptor/grease trap	goods
Dishwashing sinks	Hand washing sinks	Refrigerators/freezers*
Dry food storage areas	Hot holding equipment*	Ventilation hoods*
Floor sinks/floor drains	Ice bins/Ice machines	Staff personal item, food
		delivery cart storage, and
		eating areas

^{*} Include product specification sheets

unch () PM Snack () Dinner
on
Leftovers are cooled down and saved for another meal or snack ¹
Meals are served family style or through a buffet line
Raw meats will be cooked
Raw shell eggs will be cooked
ore in advance or if leftovers are saved for anot ation is required. ense. Example: School kitchens that serve to a
ole tableware () Both
as propored weeked vinced and conition
be prepared, washed, rinsed, and sanitiz

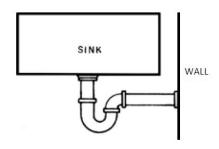

7. Indirect or Direct Plumbing

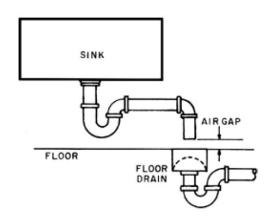

Using the diagrams below for reference, fill out the table below by indicating with an (X) which sinks are directly drained or indirectly drained. Only one (x) should be indicated for each fixture.

Fixture or Equipment	Direct Drain	Indirect Drain
Dishwashing sinks		
Dish machines		
Food Preparation Sinks		
Ice Bins/Machines		
Other		

Direct vs. Indirect Draining

Direct waste lines connect continuously from the sink basin or fixture to the sanitary sewer.

In-direct waste lines do not connect continuously to the sanitary sewer. This is achieved through an air break or an air gap as pictured above.

J. Water Demand Calculations

A. Provide the number of plumbing fixtures requiring hot water in table below.

Plumbing Fixture Requiring Hot Water	Number in facility
2-compartment sinks	
3-compartment sinks	
Commercial dish machines	
Pre-rinse sprayers	
Handsinks (include kitchens, restrooms and classrooms)	
Drinking fountains	
Mop sinks/utility sinks	
Showers	
Washing Machines for laundry	
Other:	

B. Provide the measurements of your dish washing sinks. If the compartments are different sizes, include the size of each basin.

Location	Number of Basins		imensions of Ba (Length x Width x D	
		X	X	Inches
		X	X	Inches
		X	X	Inches

C. Provide the following information about your water heaters. *Attach specification sheets*.

Hot Water Heater			
Make	Model #	KW/BTU Rating	

The plumbing fixtures below have the following requirements:

- 1. Handwashing sinks between 90°F to 120°F;
- 2. Dishwashing sinks at a minimum of 110°F;
- 3. Commercial dish machines at a minimum of 150°F
- 4. When applicable, laundry facilities at a minimum of 140°F when hot water is used to sanitize.

How will you assure that the water supplied to the following areas is maintained at the appropriate temperatures?

Annex B

Sample Breastfeeding-Friendly Child Care Policy

The [name of child care program] is committed to providing ongoing support to breastfeeding families. Supportive Environment

- We provide an atmosphere that welcomes breastfeeding families. We support moms who continue to breastfeed their babies/children as they return and continue to work.
- 2. We have a private, designated space (other than the bathroom) for moms to breastfeed their children or express milk. If a space is not available, a portable divider/partition will be made available. We welcome moms to breastfeed in the classroom, as well.
- 3. In accordance with Colorado Law, we provide employees with reasonable break time to express milk. For time needed beyond usual break/lunch time, employees may work with supervisors to negotiate break times or other means of making up the time.
- 4. We maintain a breastfeeding supportive environment through posting and providing culturally appropriate breastfeeding support materials (pictures, posters, etc.), not including those produced or supplied by commercial entities and/or manufactures of infant formula.
- 5. We "check in" with families for feedback and ways to continue providing support.
- 6. Staff communicates a baby's schedule (i.e., feeding, napping, etc.) so the mom can adjust her schedule for pumping and/or visiting to feed her baby.

Initial Contact

- 1. We discuss breastfeeding support with all potential new families and share this policy and breastfeeding resources. The policy is included in our parent/guardian handbook.
- 2. We work with families prior to their first day to transition their babies to bottle or cup feedings.

Feeding and Handling Milk

- 1. Staff follows storage and handling of breast milk, as defined by Colorado Department of Human Services regulations and Colorado Rules and Regulations Governing the Health and Sanitation of Child Care Facilities.
- 2. We discuss with all families how expressed milk is handled at our program.
- 3. Refrigerator and freezer space is available for breast milk storage.
- 4. Staff informs families on written procedures about the proper way to label and handle breast milk. Families should provide their own containers, labeled with the child's name and date.
- 5. Staff talks with parents/guardians about the quantity of milk remaining to avoid waste.
- 6. We develop a sustainable feeding plan with each family, including feeding babies on demand as we observe hunger cues and coordinating the last feeding of the day to meet the mom's feeding needs (either to feed or await mom's feeding).
- 7. Babies are fed by the same caregiver as often as possible. All caregivers hold babies when feeding.
- 8. No formula or solid foods will be provided without first checking with the family.

Staff Training

- 1. Staff receives training at least once a year on feeding and handling breast milk, breastfeeding policy, and supporting exclusive breastfeeding.
- 2. Staff is monitored for compliance with our breastfeeding policy and standards.
- 3. Families may request information about the content of breastfeeding training for our staff.
- 4. This policy is reviewed annually, updated to incorporate new evidence-based research and practices, and shared with all employees, expectant moms, families and visitors.
