

Vomit and Fecal Event Clean Up

1 Clear the area.

2 Gather supplies and proper disinfectant.

3 Clean up the area:

- Soak the vomit or fecal matter with an EPA-approved disinfectant. Cover with paper towels. Let sit for at least 10 minutes.
- Wipe up vomit or fecal matter with paper towels and discard it in a plastic bag.
- Soak the contaminated surface with the disinfectant and let sit for 10 minutes.
- Wipe with paper towels and discard in the plastic bag.
- Rinse the contaminated surface with water. Let air dry.

4 Immediately discard the plastic bag.

5 Wash, rinse, and sanitize the area if it is a food contact surface.

6 Wash and disinfect any equipment used in clean up. Wash your hands. Make sure your outer clothing is still clean.

7 Document the incident and keep it for your records.
