Note: A site map of the property with proposed lift station location is to be provided with the Minor Repair Permit application and appropriate fee. It must also show where the lift station pump line will tie into the existing system. Any applicable features that require setbacks (well, property line, buildings, etc.) must be on the map. Provide any specification sheets for above products.

It shall be the responsibility of the System Contractor to ensure that all electrical components are permitted, inspected, and approved by the electrical inspector from the agency having jurisdiction (AHJ). Douglas County Health Department (DCHD) will inspect the depth of the electrical line from the building or residence and the control panel at the time of their final inspection. The System Contractor shall refer to section 12.8 in Regulation 22-01 for requirements.
